Nexus ERP

Comprehensive System Proposal

---

1. Introduction

Nexus ERP is a fully integrated, cloud-based Enterprise Resource Planning (ERP) system designed specifically for modern gas stations operating multiple business units under one roof. These include fuel services, café, bakery, supermarket, boutique, and bridal shop operations. The system is built to unify all operational, financial, and human resource processes into a single, secure, and scalable platform.

Nexus ERP is designed as a **Software as a Service (SaaS)** solution with both **online and offline capabilities**, ensuring uninterrupted operations even during internet outages. The system is fully responsive, dynamic, and compatible with all devices including desktops, tablets, POS terminals, and smartphones.

---

2. Objectives of the System

The primary objectives of Nexus ERP are to:

- Centralize management of all business units within the gas station
- Improve operational efficiency and accountability
- Automate finance, HR, inventory, and sales processes
- Enable real-time reporting and decision-making
- Support both online and offline operations with seamless data synchronization
- Provide a scalable SaaS platform for future growth

---

3. System Overview

Nexus ERP is a **multi-tenant SaaS platform**, meaning it is hosted once on the cloud and securely shared by multiple companies through subscription access. Each company (tenant) has fully isolated data, configurations, and users.

The system supports: - Multi-user access with role-based permissions - Multi-branch and multi-department operations - Integrated POS across all business units - Offline-first functionality with automatic synchronization

---

4. Core System Features

4.1 User & Access Management

- Role-Based Access Control (RBAC)
- Designation-based permissions
- Secure authentication and session management
- Activity and audit logs for all system actions

4.2 Approval Workflows

- Configurable multi-level approvals
- Department and amount-based approval rules
- Applied to requisitions, payroll, purchases, and projects

4.3 Notifications & Alerts

- In-app, email, and SMS notifications
- Alerts for approvals, low stock, overdue advances, and system events

4.4 System Configuration

- Tax rates and receipt formats
- Approval thresholds
- Business rules per outlet or department

---

5. Finance & Accounting Module

- General ledger and chart of accounts
- Cash, bank, and mobile money account management
- Accounts payable and receivable
- Budget creation and enforcement
- Expense tracking
- Payroll processing with deductions and advances
- Financial statements (Profit & Loss, Balance Sheet)
- Outlet-level and consolidated financial reporting
- Tax calculations and reporting

---

6. Human Resources & Internal Operations

- Employee records and contracts
- Attendance and timesheets
- Leave management (annual, sick, maternity, unpaid)
- Cash requisitions and staff advances
- Approval workflows for HR requests
- Payroll inputs and previews
- Asset assignment to staff
- HR analytics and reports

7. POS, Sales, Invoicing & Receipts

- Multi-outlet POS system
- Support for fuel pumps, café, bakery, supermarket, boutique, and bridal shop
- Barcode and SKU-based sales
- Automatic stock deduction
- Discount and promotion management
- Invoice and receipt generation
- Thermal and A4 printing support
- Multiple payment methods: cash, bank, mobile money
- Daily cashier reconciliation

8. Inventory & Store Management

- Product and service catalog
- Multi-store and warehouse support
- Stock-in, stock-out, and transfers
- Reorder level alerts
- Supplier management
- Purchase orders and deliveries
- Stock audits and adjustments
- Perishable goods and expiry tracking
- Bundled product management

9. Fuel Station Management

- Fuel sales tracking per pump and attendant
- Tank level and fuel inventory monitoring
- Daily fuel reconciliation
- Shift-based pump reporting
- Fuel variance and loss alerts

10. Café & Bakery Management

- Menu and recipe management
- Ingredient-level stock deduction
- Costing per item
- Dine-in and takeaway order management
- Promotions and combo offers
- Waste and expiry tracking

11. Supermarket, Boutique & Bridal Shop Management

- Multi-category inventory management
- Barcode scanning for fast checkout
- Bundle and package sales (e.g., bridal packages)
- Outlet-specific stock and sales reports

---

12. Project Management

- Project and task management
- Staff assignment
- Project budgets and expense tracking
- Time tracking
- Project profitability reports
- Approval workflows

---

13. Subscription Billing

- Subscription plan creation
- Monthly and annual billing cycles
- Automatic invoice generation
- Payment tracking
- Revenue recognition and reporting

---

14. Manufacturing & Bill of Materials (BOM)

- Raw material tracking
- Production orders
- Work-in-progress monitoring
- Finished goods inventory
- Costing per unit
- Automatic raw-to-finished stock conversion

---

15. Asset Management

- Asset registration and categorization
- Assignment to departments or staff
- Maintenance and service logs
- Depreciation tracking
- Disposal records

---

16. Mobile Money Integration

- MTN MoMo and Airtel Money integration
- STK push and payment confirmations
- Automatic reconciliation with POS and finance
- Secure transaction logs

---

17. Tax Authority Integration

- VAT calculation and reporting
- Electronic invoicing support
- Export-ready tax reports
- Audit-ready compliance logs

---

18. Reporting & Analytics

- Role-based dashboards
- Sales and revenue reports per outlet
- Fuel performance analytics
- Inventory movement and stock aging
- HR and payroll reports
- Project and subscription performance
- System audit and activity logs

---

19. Online & Offline Capability

Nexus ERP operates seamlessly both online and offline:

- Full POS and operational functionality when offline
- Local device storage for transactions
- Automatic background synchronization when internet returns
- Conflict detection and reconciliation
- Zero data loss and uninterrupted operations

---

20. Responsiveness & Device Compatibility

- Fully responsive design
- Works on desktops, tablets, POS terminals, and smartphones
- Touch-friendly interfaces for POS and mobile devices
- Progressive Web App (PWA) support

---

21. SaaS Architecture & Hosting

- Cloud-hosted SaaS platform
- Multi-tenant architecture
- Secure data isolation per company
- Subscription-based access
- Automatic updates and backups
- Scalable infrastructure

---

22. Benefits to the Client

- Single unified system for all operations
- Improved accountability and transparency
- Reduced operational errors and losses
- Real-time visibility into business performance
- Scalability for future growth
- Reduced IT and infrastructure costs

---

23. Conclusion

Nexus ERP is a robust, future-ready enterprise management solution designed to meet the complex needs of modern gas stations with multiple business units. By combining finance, HR, inventory, POS, fuel management, and analytics into one fully responsive and offline-capable SaaS platform, Nexus ERP provides a reliable foundation for operational excellence and sustainable growth.
